

Vil du undersøge plante transportere?

Bjørn Panyella Pedersen
bpp@mbg.au.dk

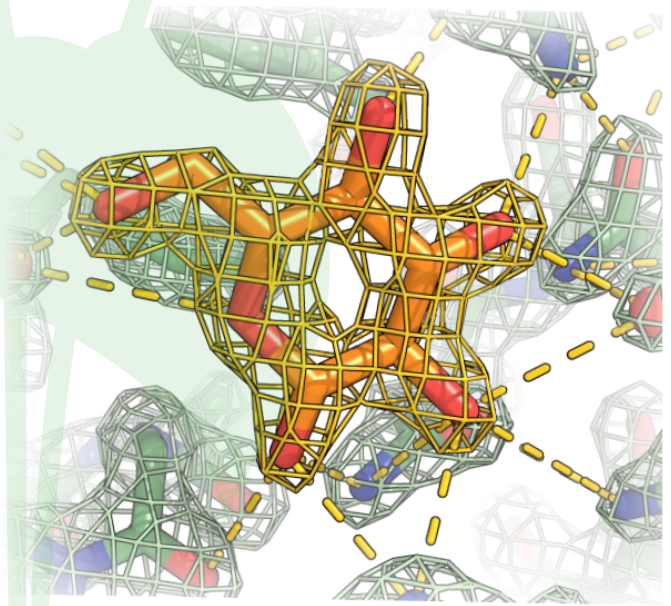

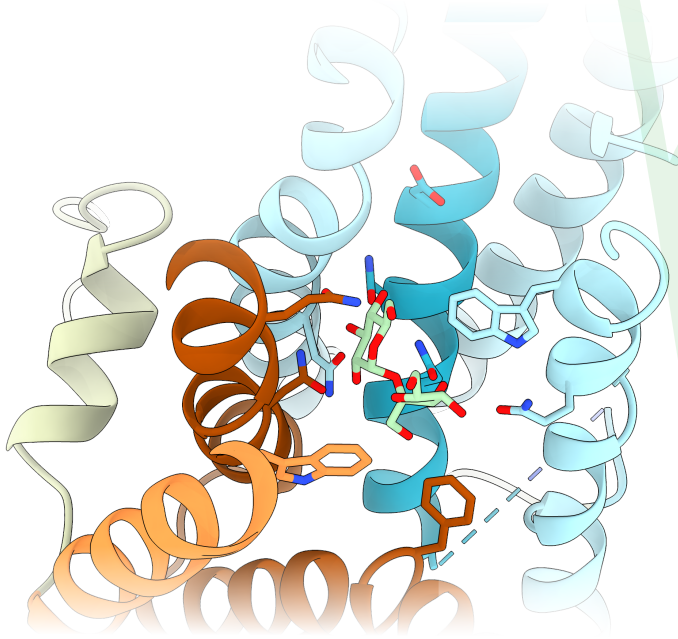

pedersenlab.dk

Vores gruppe bruger biomolekylær strukturbestemmelse og biofysisk karakterisering til at forstå, hvordan transport proteiner bruger protoner til at transportere molekyler over cellemembranen.

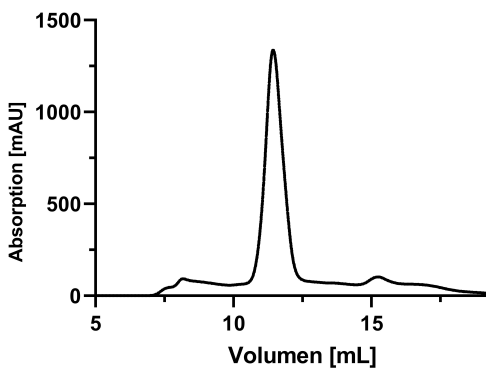

Hvad kan du arbejde med?

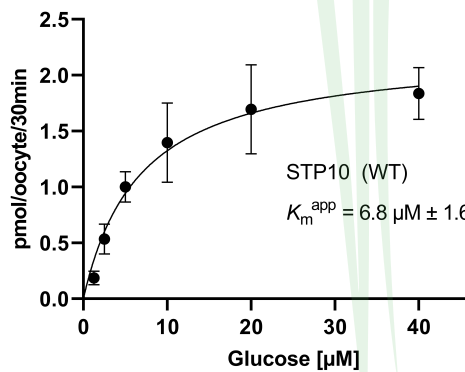

1. Strukturbestemmelse af plante transportere
2. Hvad provokerer forskellige transport konformationer?
3. Hvordan genkendes forskellige ligander i bindingslommer?

Size exclusion chromatography

Transport assays in oocytes

Competition assays in oocytes
