

BRIAN CLARK BIOTECH LECTURE

Wednesday 8 November 2017, at 14:15–16:00
Science Park (3130-303), Gustav Wieds vej 10

Please sign up by sending an email to metteki@mbg.au.dk

Søren Jensby Nielsen, Director of Biology
Nuevolution
Copenhagen

About the seminar:

Søren Jensby Nielsen will introduce the current research programmes at Nuevolution and discuss the company's approach towards university collaborations. There will be a 45-minute talk by Søren followed by questions/discussion.

About Nuevolution:

Nuevolution AB (publ) is a leading small molecule drug discovery biotech company founded in 2001, headquartered in Copenhagen, Denmark.

The company partners its proprietary discovery platform and programmes with pharmaceutical and biotechnology companies to seek future benefit of patients in need of novel medical treatment options.

Nuevolution's internal programmes are focused on therapeutically important targets within inflammation, oncology and immuno-oncology.
