

MBG Jingle Bells

The temperatures are low
on floor six where we stay
But on and on we go
Science all the way
A few things aren't there
the labs still feel quite bare
But oh what fun it is to sing
A 6th floor song tonight

Oh, 6th floor fun, 6th floor fun
6th floor all the way,
Oh what fun it is to live
in a brand new lab today
Oh, 6th floor fun, 6th floor fun
6th floor all the way,
Erik he will fix it all
so that we can further play.

Fifth floor takes the lead
Plant group grows the weed
Erik is in need
Admin's up to speed!
DANDRITE pumps the brain
Pia takes a Lene
Oh, what fun is PhD, Ernst
Martin soothes the pain!

MBG – harmony, stars are
bright and clear!
Postdocs do experiments, Inga
cools the beer - Hey!
MBG – harmony, techs place
hearts to see.
If you're down and lost your
way, five stairs to himmerRie!

Working night and day
While making RNA
Taking care of flies
Striving to be wise
And proteins are here too
There's plenty o' things to do
As neurons from the brain,
Will make this song remain:

On 4th floor, We're hard core
Here at MBG.
There's no better place to be,
Why don't you come and see?

Dashing through third floor
With some chemicals in hands
To do another round
We'll never understand
Mixing up solutions
Spinning till it's clear
And drying out precipitate
Till we get out of here!

Ethanol, alcohol
Help us through the day.
Working days will be more fun
While sipping chardonnay. Hey!
Jingle bells, Zinfandel,
Pass the Cabernet;
Working days will be more fun
On a buzz till holiday.

Moving all our gear
Using every space
And a whole new place
In a very busy year
Now the times have changed
Life is not first class
Everyone must do their best
To not freeze off their butt OH

Cheer us up – cheer us up
Drink it all away
Let us rise a claret cup
Although life is grey, Hey
Heat us up - heat us up
Burn away the tears
No one want to sit and freeze
The last remaining years
